More tips to choose the right card:

- **A useful tip for the CFexpress and SD dual-slot cameras:** Each application or file format requires different memory card. Suggest choosing the memory card based on the camera manufactures' user manual. For instance, [Canon R5](#), [Sony FX3](#), [FX6](#), [Alpha 1](#), [Alpha 7S III](#), and [Alpha 7 IV](#).
- Lexar® Professional 1066x SD and High-Performance 800x SD only support UHS-I interface.
