

SDXC UHS-II Memory Cards

Nextorage

NX-F2PRO Series

256GB / 128GB / 64GB

CLOSE TO THE HIGHEST UHS-II STANDARD

NX-F2PRO Series is for videographers and photographers who require both the convenience of SD memory cards and high levels of write/read speed. These cards offer superior performance for 8K video recording*2 and high-speed continuous shooting.

Max Read 300 MB/s*1
Max Write 299 MB/s*1

NX-F2PRO Series achieves a transfer speed that is almost at the upper limit of the UHS-II standard value, providing a comfortable workflow from shooting to data transfer operations after shooting.

IDEAL FOR 8K RECORDING*2

NX-F2PRO Series is compliant with V90 (guaranteed minimum transfer rate: 90 MB/s), the highest standard in the SD video speed class, so it supports 4K and 8K high-definition video recording*2 and high-speed continuous shooting in RAW quality.

CAPTURE THE DECISIVE MOMENT

High-speed writing performance reduces buffer release time (the time it takes for data writing to be completed), so you will not miss the decisive moment in continuous shooting of sports, trains, animals, etc.

*1 Based on Nextorage test conditions. The actual performance may vary with host devices and environments. For devices that don't support UHS-II, the transmission speed will be different due to interface limitations.

*2 The specifications required for 8K video recording may vary depending on the device. Be sure to check your host device spec before use.
