## Contents

Keyboard, Mouse, Nano receiver, 2 x AAA battery, 2 x AAA battery

Say goodbye to noise and hello to silence with the Verbatim® Silent Compact Keyboard and Mouse. With a silent key design on the keyboard and silent click switches on the mouse, these Verbatim products are truly silent.

This combo features 2.4Ghz wireless communication, so there are no delays in what you type and what you see on-screen. The included nano receiver, used to connect both the mouse and keyboard to your device, is small enough to stay connected and stores inside the mouse for easy travel.

The keyboard features hot keys that provide instant access to media controls, putting your music at your fingertips. And the compact design saves space in your setup without compromising on functionality.

The mouse features 1600 DPI, for higher precision and accuracy while clicking, and an ergonomic design for comfortable use all day long. And thanks to Multi-Trac Blue LED technology, this mouse allows you to point and click on more surfaces than other mice – from a glass table to the granite kitchen counter!
